Feast Crew and Menu

Name _____ Date ____/____/_____

Here is your Feast Crew. Read each job out loud to the family. Then write the menu together.

Job	Who
Head Planner (that's you!)	Ethan
Co-Planner and Price Checker	Mom (Skyler)
Head Taster and Interview Guest	Dad (Matt)
Table Artist and Taste-Tester	Joyce
Official Counter and Taste-Tester	Clyde

Our feast is on _____ (day and date). _____ people will eat.

Course	Dish	Who picked it?

Menu art by Joyce:

Feast Word Bank

Name _____ Date _____/_____/_____

Read each word and its meaning out loud. Use at least 2 of these words on your poster.

budget: the amount of money you plan to spend

estimate: a careful guess that is close to the real number

quantity: how many or how much of something

portion: the amount of food that one person gets

viewpoint: what one person thinks or believes about something

evidence: facts or words that show something is true

⤵ FOLD HERE: fold the top of the page back on this line so the Word Bank is hidden ⤵

From memory: read the meaning, then write the word. Spell it exactly. No peeking!

Meaning	Try 1 · Sun, Nov 15	Try 2 · Fri, Nov 20
1. the amount of food that one person gets		
2. the amount of money you plan to spend		
3. facts or words that show something is true		
4. how many or how much of something		
5. what one person thinks or believes about something		
6. a careful guess that is close to the real number		

Unfold and check. Try 1: _____ out of 6 Try 2: _____ out of 6

Price Hunt

Name _____ Date ____/____/_____

Find the **real** price of each thing you need: at the store, on the store's website, or in the weekly ad. Write money with a $ and two digits after the decimal point. Then multiply: price × how many = cost.

Example: rolls cost $3.49 a bag. We need 2 bags. $3.49 × 2 = $6.98

Item	Size (like 5 lb)	Price for one	How many	Cost

Add all the costs. Line up the decimal points! Total: $ _____

Our budget: $ _____

Are we over or under? _____ By how much? $ _____

Show the subtraction here:

After shopping: the real total on the receipt was $ _____.

My estimate was off by $ _____.

Feast Math Warm-Up

Name _____ Date _____/_____/_____

These are like the problems from Lessons 1 to 4. Show your work in each box. Write your answer on the line, with the unit (grams, miles, $, cups).

1. If one serving of mashed potatoes is 125 grams, how many grams do 14 servings take? Use an **area model** or **partial products**.

Answer: _____ **grams**

2. ✈️ A pilot flies 245 miles on each trip. She makes 12 trips. How many miles is that in all? Use the **standard algorithm**.

Answer: _____ **miles**

3. There are 38 rolls for 5 people. Everyone gets the same number. How many rolls does each person get? How many are left over?

Each: _____ **Left over:** _____

4. Paper plates come in packs of 12. The family needs 50 plates. How many packs must they buy? Think about the remainder!

Answer: _____ **packs**

5. A recipe uses ½ cup of brown sugar and ⅓ cup of white sugar. How much sugar is that in all? Find a common denominator first.

Answer: _____ **cup**

6. A pie is cut into equal slices. ¼ of the pie is eaten at lunch and ⅛ of the pie is eaten at dinner. What fraction was eaten? What fraction is left?

Eaten: _____ **Left:** _____

7. If a can of cranberry sauce costs $1.79, how much do 3 cans cost?

Answer: $ _____

8. Potatoes cost $4.25 and butter costs $3.89. Line up the decimal points and add. Then: you pay with a $10 bill. How much change do you get back?

Total: $ _____ **Change: $** _____

Scale It Up

Name _____ Date _____/_____/_____

Pick one real recipe from your menu. Copy each ingredient. Then make it big enough for everyone.

Example: a recipe serves 4 and uses ¾ cup of milk. We need 8 servings, so we multiply by 2. ¾ × 2 means ¾ + ¾ = 6/4 = 1 1/2 cups.

Recipe name: _____

The recipe serves _____ people. We need _____ servings. _____ ÷ _____ = _____, so I multiply every amount by _____.

If the division does not come out even, round up. A little extra food is better than not enough! **Fraction × whole number:** ¾ × 2 means ¾ + ¾. Add the fraction that many times.

Ingredient	Amount in the recipe	× ___	New amount

Fraction check: find two amounts in your new recipe that use the same unit (like cups). Add them. If the denominators are different, find a common denominator first.

Fair Share

Name _____ Date _____/_____/_____

Part 1 · Share the leftovers

Clyde counts the leftovers (rolls, cookies, or slices). Ethan divides them so everyone gets the same number.

We have _____ _____ (what?) for _____ people.

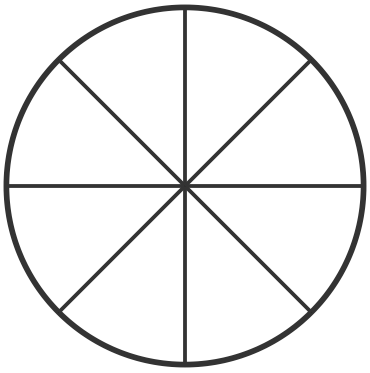

_____ ÷ _____ = _____ R _____

Each person gets _____. There are _____ left over.

What should we do with the leftover ones? Save them, share them with someone, or cut them into pieces? Explain.

Part 2 · The pie picture

Ethan counts the slices of pie (or cake) that were eaten and points to one slice on the picture for each; Joyce colors each slice he points to. If your pie was not cut into 8 slices, draw your own pie on the back.

_____ of 8 slices were eaten. Eaten: _____ / 8 Left: _____ / 8

Can you write the eaten fraction a simpler way? (Example: 4/8 = 1/2)

Viewpoint Interview

Name _____ Date ____/____/____

Ask Mom and Dad these 3 questions (about 5 minutes each). Write the most important words they say. Put their exact words in quotation marks: "like this." These words are your **evidence**.

1. What is the most important part of a great family meal: the food, the people, or something else? Why?

Mom: Dad:

2. Should a holiday meal be fancy or simple? Why?

Mom: Dad:

3. What is one thing you would change about how we do holiday meals?

Mom: Dad:

Two Viewpoints, One Feast

Name _____ Date ____/____/____

Use your interview (page 7). Plan first. Then write one paragraph.

Mom's viewpoint	Dad's viewpoint
Evidence: her exact words	**Evidence: his exact words**

How are their viewpoints the same? How are they different?

My paragraph

1. Main idea sentence. 2. Mom's viewpoint and her evidence. 3. Dad's viewpoint and his evidence. 4. How they are alike or different. 5. Your own viewpoint. Use the words **viewpoint** and **evidence**.

Taste-Test Scorecard

Name _____ Date _____/_____/_____

At the feast, everyone rates each dish. Mom, Dad and Ethan give 1 to 5 stars. Joyce and Clyde point to a face, and Ethan writes the stars: 😀 = 5 🙂 = 4 😐 = 3 😕 = 2 😖 = 1

Dish	Mom	Dad	Ethan	Joyce	Clyde	Total

1. Which dish got the highest total? _____ How many stars? _____

2. Which dish got the lowest total? _____

3. 5 people × 5 stars = 25 stars is a perfect score.
Write the top dish's score as a fraction: _____ / 25

4. Write one main idea sentence about what the family liked best.

Little Storytellers

Name _____ Date ____/____/____

Ask Joyce, then Clyde: *What was your favorite part of the feast? What happened?* Write their words exactly, even the funny parts. Read it back to them to check you got it right.

Told by Joyce · Written down by Ethan

Joyce draws a picture here.

Clyde draws a picture here.

Feast Report: Poster Plan

Name _____ Date ____/____/____

Plan your poster here. You will present it in 3 to 5 minutes at Lesson 5.

Main idea sentence (what your whole poster is about):

Detail 1 · The budget (total cost, budget, over or under):

Detail 2 · The recipe I made bigger (show one step of the math):

Detail 3 · The taste-test winner:

Detail 4 · Two viewpoints (one sentence about Mom's and Dad's views):

Poster checklist

- ☐ Title: The Ferguson Family Feast
- ☐ Price Hunt total and budget
- ☐ Taste-test winner
- ☐ 2 Word Bank words
- ☐ The menu, with Joyce's art
- ☐ One math example, step by step
- ☐ Your Two Viewpoints paragraph
- ☐ Your name

Bring to Lesson 5 (Wed, Dec 2): ☐ the poster ☐ worksheet pages 1 to 11

🍽️ The Ferguson Family Feast Planner

Thu, Nov 12 – Tue, Dec 1 · Ethan presents it at **Lesson 5, Wed, Dec 2 (in person)**

What it is: Ethan is Head Planner for one special family meal (Thanksgiving dinner on Thu, Nov 26, or another family dinner during the break). He plans the menu, finds real prices and keeps to a budget, makes a recipe bigger, shares leftovers fairly, runs a taste-test, interviews Mom and Dad, and makes a Feast Report poster.

Time: 10 to 25 minutes a day for Ethan (shown on each day). Page 4 reviews Lessons 1 to 4 before the Unit 2 Checkpoint at Lesson 5. **Thu Nov 12–Tue Nov 17: finish Lesson 4's task list first; the project's daily part is short those days.**

Who is in it

Skyler Mom · Co-Planner and Price Checker	**Matt** Dad · Head Taster and Interview Guest	**Ethan** Head Planner · leads the project	**Joyce** Little sister · Table Artist and Taste-Tester	**Clyde** Little brother · Official Counter and Taste-Tester

Supplies

- The 11 printed worksheets (page 3 twice if you buy more than 10 items)
- Poster board or 2 sheets of paper taped together; markers, scissors, glue or tape
- Measuring cups and spoons; a store, its website, or the weekly ad for prices

Head Planner rules

1. Every price is a real price, written like $3.49.
2. Math by hand first, then check with a calculator.
3. Joyce and Clyde each pick one dish.
4. Interview answers: write exact words in quotation marks.

What to bring on Wed, Dec 2

The poster and worksheet pages 1 to 11.

Ferguson Family Feast Planner

Week 1 · Plan the feast (Thu, Nov 12 – Sun, Nov 15) · Lesson 4's task list comes first

Day	Whole family	Ethan	Done
Thu, Nov 12	**Family meeting** (10 minutes). Skyler reads "What it is" out loud. Choose the feast: Thanksgiving dinner on Thu, Nov 26, or another special family dinner. Joyce and Clyde each pick one dish.	Lesson 4's task list first. Then lead the meeting with Mom and fill in **Feast Crew and Menu** (page 1) as the family decides. ⏱ 10 min	☐
Fri, Nov 13	No family part today.	Lesson 4's task list first. Then **Feast Math Warm-Up** (page 4), problems 1 and 2. Show your work in each box. ⏱ 10 min	☐
Sat, Nov 14	**Price hunt.** Mom or Dad and Ethan look up prices: at the store, on the store's website, or in the weekly ad. Joyce and Clyde help spot the items.	Lesson 4's task list first. On **Price Hunt** (page 3), write each item, its size, its real price, and how many you need. No math yet. ⏱ 10 min	☐
Sun, Nov 15	Joyce draws the menu picture on page 1.	Lesson 4's task list first. Read the Word Bank (page 2) out loud to the family. Then **Word Bank, Try 1**: fold the page and write each word from memory. ⏱ 10 min	☐

Ferguson Family Feast Planner

Week 2 · Do the math (Mon, Nov 16 – Sun, Nov 22)

Day	Whole family	Ethan	Done
Mon, Nov 16	Mom or Dad tells Ethan the budget: how much money the family wants to spend on the feast.	Lesson 4's task list first. On page 3, write the budget. Then fill in the **Cost** column: price × how many. ⏱ 10 min	☐
Tue, Nov 17	No family part today.	Lesson 4's task list first. Then **Feast Math Warm-Up** (page 4), problems 3 and 4. ⏱ 10 min	☐
Wed, Nov 18	No lesson today.	Finish **Price Hunt** (page 3): add the costs with the decimal points lined up, and compare the total with the budget. ⏱ 15 min	☐
Thu, Nov 19	Mom and Dad each answer Ethan's 3 interview questions (about 5 minutes each).	**Viewpoint Interview** (page 7). Write their exact words in quotation marks. ⏱ 15 min	☐
Fri, Nov 20	No family part today.	**Two Viewpoints, One Feast** (page 8): fill in the plan at the top. Then **Word Bank, Try 2** (page 2). ⏱ 25 min	☐
Sat, Nov 21	No family part today.	Write your paragraph on page 8. Use the words **viewpoint** and **evidence**. Read it out loud and check: a main idea sentence, evidence in quotation marks, and a closing sentence. ⏱ 20 min	☐
Sun, Nov 22	**Off.** Family day.		☐

Ferguson Family Feast Planner

Week 3 · Feast week (Mon, Nov 23 – Sun, Nov 29)

Day	Whole family	Ethan	Done
Mon, Nov 23	Help Ethan choose one real recipe from the menu.	**Scale It Up** (page 5): make the recipe big enough for everyone. ⏱ 20 min	☐
Tue, Nov 24	Whenever you shop this week, Ethan brings Price Hunt (page 3) and checks off each item.	**Feast Math Warm-Up** (page 4), problems 5 to 8. ⏱ 20 min Whenever you shop, fill in the bottom of page 3: the real total on the receipt, and how far off your estimate was. ⏱ 5 min	☐
Wed, Nov 25	No lesson today. Get the table ready: Clyde counts plates, forks and cups (one for each person), then writes a name card for each person (a grown-up can help with the letters). Joyce decorates the name cards.	Help measure the recipe with your **Scale It Up** amounts (page 5). ⏱ 15 min	☐
Thu, Nov 26 · Thanksgiving	**Feast day!** At the meal, everyone rates each dish on the **Taste-Test Scorecard** (page 9). Enjoy!	Run the taste-test. Write every score in the table. ⏱ 10 min	☐
Fri, Nov 27	Leftovers! Clyde counts the leftover rolls (or cookies, or slices). Joyce colors the pie picture.	**Fair Share** (page 6). ⏱ 15 min	☐
Sat, Nov 28	Joyce tells Ethan the story of the feast.	**Little Storytellers** (page 10, top half): write down Joyce's story. Then add up the taste-test scores and answer the questions on page 9. ⏱ 25 min	☐
Sun, Nov 29	Clyde tells Ethan the story of the feast.	**Little Storytellers** (page 10, bottom half): write down Clyde's story. Then start your poster: fill in **Feast Report: Poster Plan** (page 11). ⏱ 25 min	☐

Ferguson Family Feast Planner

Week 4 · Make it and show it (Mon, Nov 30 – Wed, Dec 2)

Day	Whole family	Ethan	Done
Mon, Nov 30	No family part today.	Make the poster from your plan on page 11. Use the checklist. ⏱ 20 min	☐
Tue, Dec 1	**Practice show.** The family sits and listens. After Ethan presents, each person says one thing they liked.	Practice presenting the poster in 3 to 5 minutes. Look at the family, not only at the poster. Pack the poster and pages 1 to 11. ⏱ 15 min	☐
Wed, Dec 2	Lesson 5 is in person. Send the poster and the worksheets with Ethan.	Present your Feast Report poster to Jonathan (3 to 5 minutes). Then do the Unit 2 Checkpoint.	☐

Answer Key (for parents)

Feast Math Warm-Up (worksheet page 4). Price Hunt, Scale It Up, Fair Share and the taste-test use your family's own numbers, so check those by redoing the math together.

Feast Math Warm-Up

#	Answer
1	14 × 125 = 1,750 grams (area model: 10 × 125 = 1,250 and 4 × 125 = 500; 1,250 + 500 = 1,750)
2	245 × 12 = 2,940 miles (245 × 2 = 490; 245 × 10 = 2,450; 490 + 2,450 = 2,940)
3	38 ÷ 5 = 7 R3: each person gets 7 rolls, and 3 are left over
4	50 ÷ 12 = 4 R2. 4 packs is only 48 plates, so they must buy 5 packs
5	1/2 + 1/3 = 3/6 + 2/6 = 5/6 cup
6	1/4 + 1/8 = 2/8 + 1/8 = 3/8 eaten; 8/8 − 3/8 = 5/8 left
7	$1.79 × 3 = $5.37
8	$4.25 + $3.89 = $8.14; $10.00 − $8.14 = $1.86 change
